Education

TONIK®

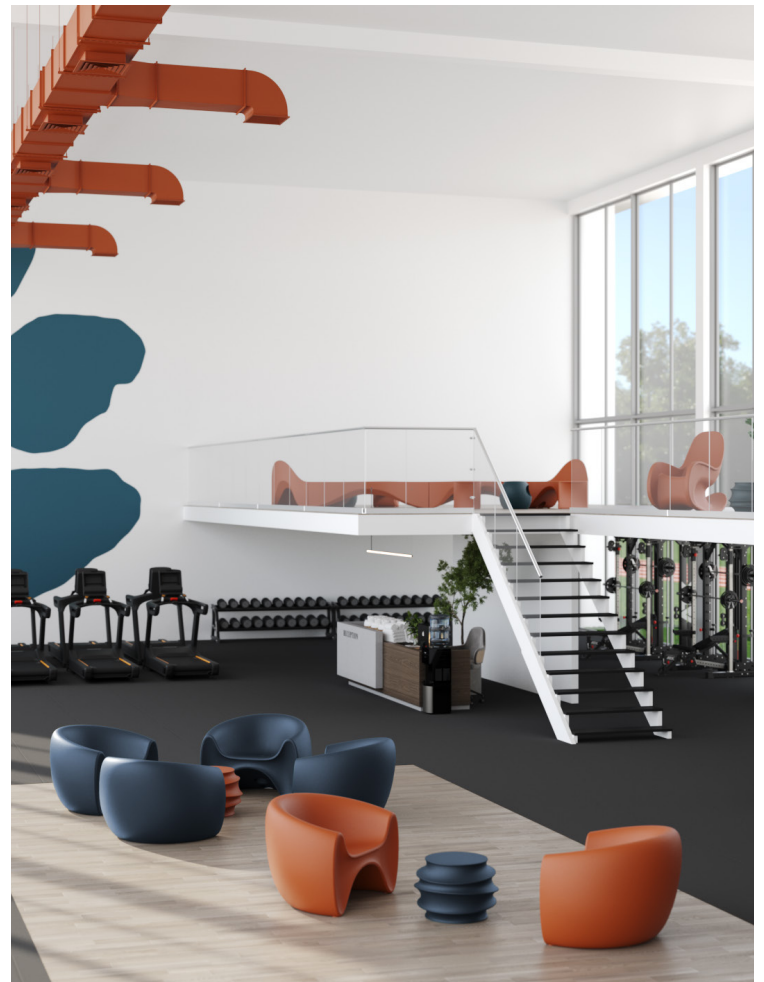

Less Screen, More Green

On average, 44% of a student's week is spent in front of a screen, with less than 10 minutes per day engaged in active play outdoors. Many school districts have begun placing a greater focus on SEL (social and emotional learning) and biophilic design, resulting in an increase in mandated time spent outdoors. Tonik's highly durable, weather-resistant and kid-friendly furniture options are an ideal solution for outdoor learning.

Learning In Color

When applied with understanding and purpose, color can be used to promote self-confidence, uplift the spirit, and reduce behavioral discord. Integrating the bright colors of Tonik products into your learning environment can help create an energized and positive atmosphere that supports cognitive development.

A Sustainable Approach

Tonik's fun and funky pieces are recyclable and are made from ocean-bound plastic – meaning we're re-routing the fate of hundreds of thousands of pounds of trash to repurpose as sustainable furniture. Ocean-bound plastic in Tonik furniture helps make your space look great, and your conscience feel good!
